

City of Aransas Pass, Texas
INVESTMENT POLICY AND STRATEGY

Adopted January 22, 2019

I. INTRODUCTION

It is the policy of the City of Aransas Pass that the administration of its funds and the investment of those funds shall be handled as its highest public trust. Investments shall be made in a manner which will provide the maximum security of principal while meeting the daily cash flow needs of the City and conforming to the Public Funds Investment Act (the " Act") Texas Government Code Chapter 2256. It is the intent of the City to be in complete compliance with local law and the Act.

The receipt of a market rate of return will be secondary to the requirements for safety and liquidity. The earnings from investment will be used in a manner that best serves the interests of the City.

The purpose of this Policy is to set specific investment policy and strategy guidelines. Direct specific investment parameters for the investment of public funds in Texas are found in the Act. The Public Funds Collateral Act, Chapter 2257, Texas Government Code, specifies collateral requirements for all public Texas funds deposits.

II. SCOPE

This investment policy applies to all financial assets of the City and any new funds created unless specifically exempted by the City Council and this Policy.

III. OBJECTIVES

It is the policy of the City that all funds shall be managed and invested with four primary objectives, listed in order of their priority: safety, liquidity, diversification and yield. Investments are to be chosen in a manner which promotes diversity. To match anticipated cash flow requirements the maximum weighted average maturity (WAM) of the overall portfolio may not exceed 6 months.

Safety

The primary objective of the investment activity is the preservation of capital. Each investment transaction shall be conducted in a manner to avoid capital losses, whether from security defaults, safekeeping, or erosion of market value. Investments in high credit quality securities and decisions based on anticipated cash needs are primary factors in providing safety.

Liquidity

The investment portfolio shall be structured to meet all expected obligations in a timely manner. This shall be achieved by matching investment maturities with forecasted cash flow liabilities and maintaining additional liquidity for unexpected liabilities.

Diversification

The portfolio shall be diversified by institution, market sector and maturity as much as possible.

Yield

The benchmark for the commingled portfolio shall be the comparable period of 6 months U.S. Treasury Bill, designated for its comparability to the expected average cash flow pattern and the Policy maximum weighted average maturity (WAM) limit of 6months. The investment program shall seek to augment returns above this threshold consistent with risk limitations identified and the City's prudent investment strategy.

Cash management is the process of managing funds in order to insure maximum cash availability and reasonable yield on short-term investments. The City shall strive for a cash management program which includes timely collection of accounts receivable, vendor payments in accordance with invoice terms, and prudent investment of assets.

IV. INVESTMENT STRATEGY

The City maintains one commingled portfolio for investment purposes which incorporates the specific uses and the unique characteristics of the funds in the portfolio. The investment strategy has as its primary objective assurance that anticipated liabilities are matched and adequate investment liquidity provided. The City shall pursue conservative portfolio management strategy. This may be accomplished by creating a laddered maturity structure with some extension for yield enhancement. The maximum maturity of any security will be 24 months and the maximum dollar weighted average maturity of 6 months or less will be calculated using the stated final maturity date of each security.

The investment strategy for debt service funds shall have as its primary objective the timely payment of debt service obligations. Successive debt service dates will be fully funded before any investment extensions are made.

V. DELEGATION OF RESPONSIBILITY

No unauthorized person may engage in an investment transaction and all transactions shall be executed as provided under the terms of this Policy and its supporting procedures.

Investment Officer(s)

The City Manager and Director of Finance will be designated as Investment Officers, by governing body resolution, responsible for investment decisions and activities. In determining whether an investment officer has exercised prudence with respect to an investment decision, the determination shall be made taking into consideration the investment of all funds under the City's control, over which the officer has responsibility rather than a consideration as to the prudence of a single investment.

The Investment Officer, acting in accordance with written procedures and exercising due diligence, shall be responsible but not liable for a specific security's credit risk or market price changes, provided that these deviations are reported immediately and that appropriate action is taken to control adverse developments.

Internal Controls

The Investment Officer is responsible for establishing and maintaining internal controls to reasonably assure that assets are protected from loss, theft, or misuse.
